ZARMEEN GARDENS REAL ESTATE ERP · LAND ACQUISITION GUIDE

Land acquisition — khasras, sellers, deals and payments

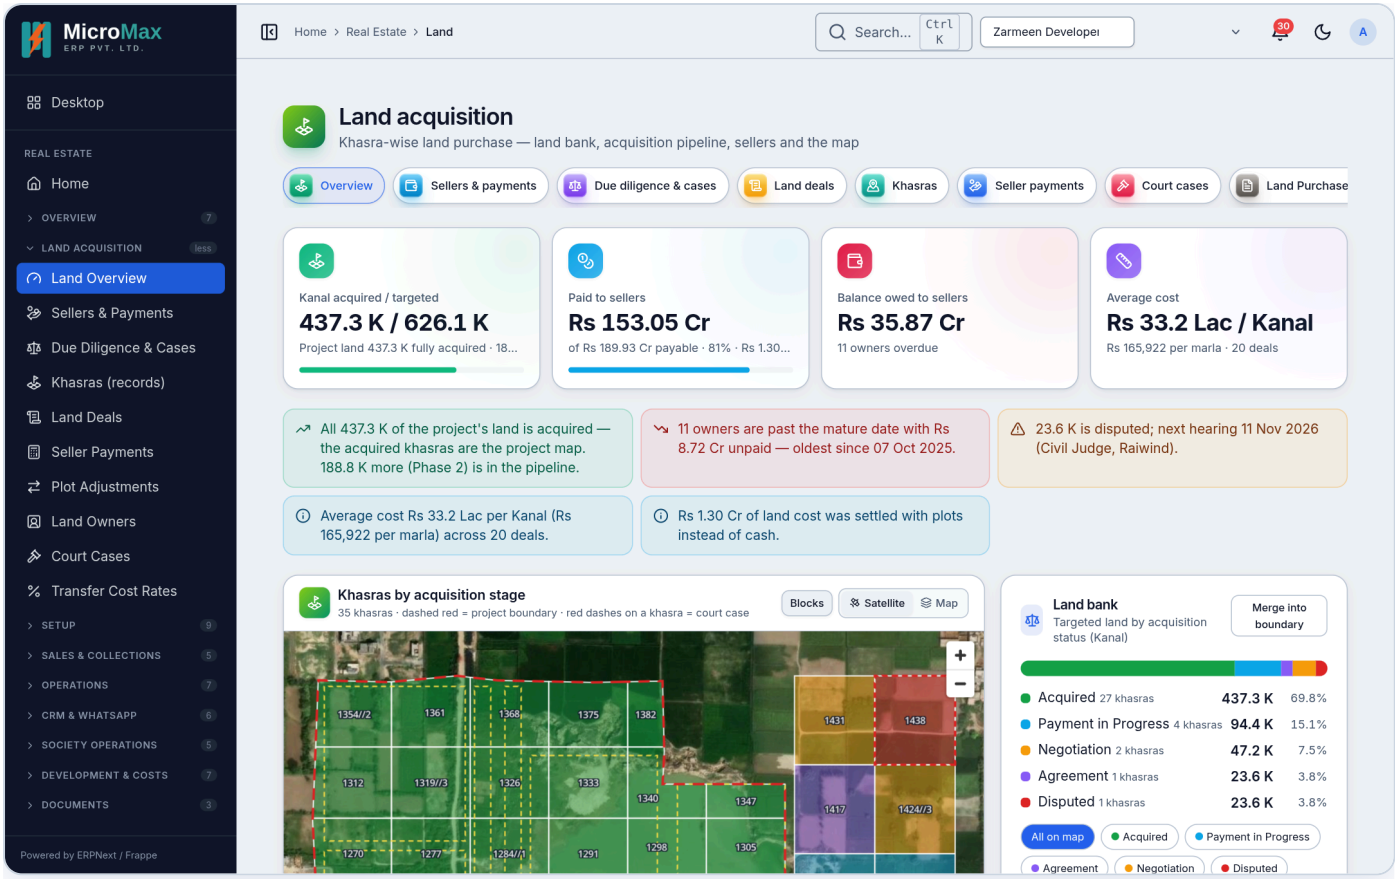

How land is bought before it is plotted: khasras and their co-owners per fard, due diligence, the deal sheet and agreement to sell (iqrar nama), approval and purchase invoices, seller payments, plots instead of cash, registry and the land cost.

1 · Khasra	2 · Diligence	3 · Deal	4 · Approve & pay	5 · Registry
Co-owners & shares from the fard	9 checks, 7 required	Owner lines, iqrar nama	Invoices, payments, plots	Acquired, capitalised

Who: Land Manager (khasras, deals, payments), Admin / Accounts Manager (approvals), Accounts (payments, ledger).

1 The land bank

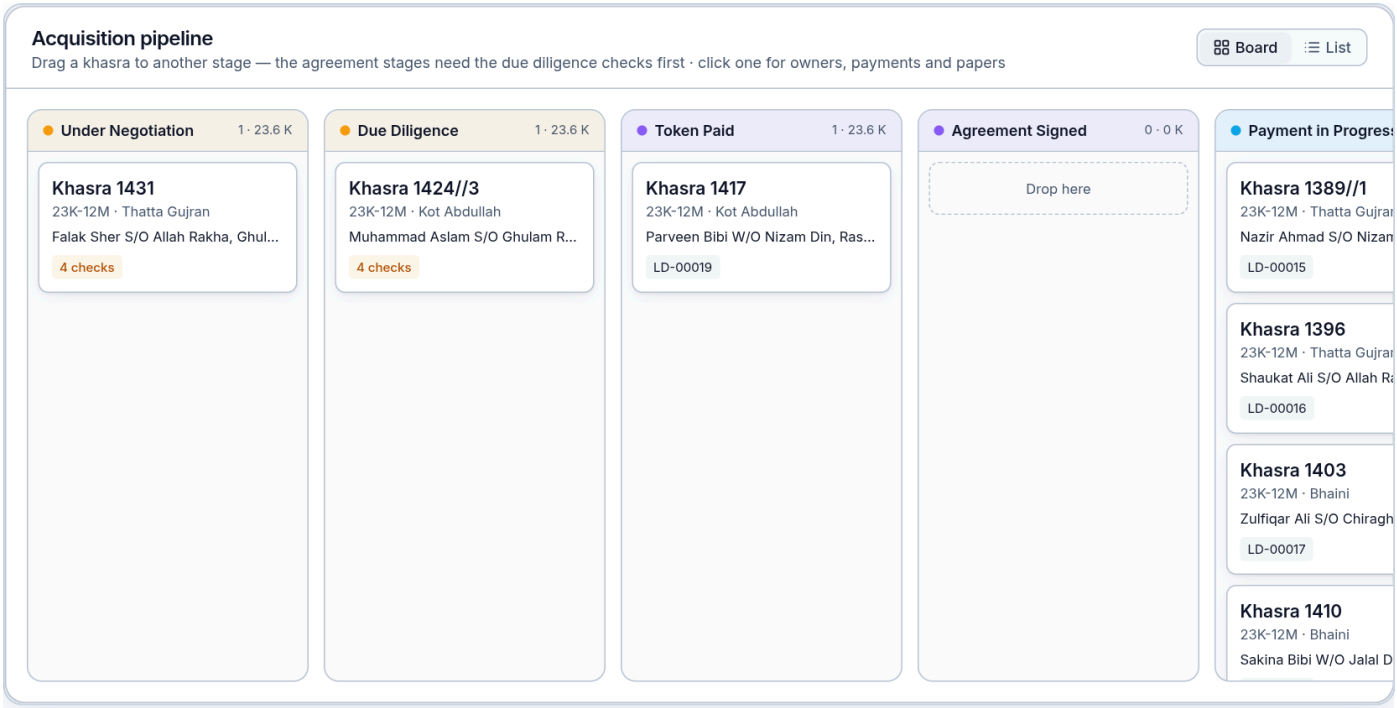

1. **Land Acquisition → Land Overview** shows Kanal acquired against the target, paid and payable to sellers and the average cost per Kanal.
2. The map colours every khasra by stage; the acquired khasras are exactly the project boundary. Phase 2 khasras are still in the pipeline.
3. Highlights call out overdue owners, disputes and their hearings, and land settled with plots.

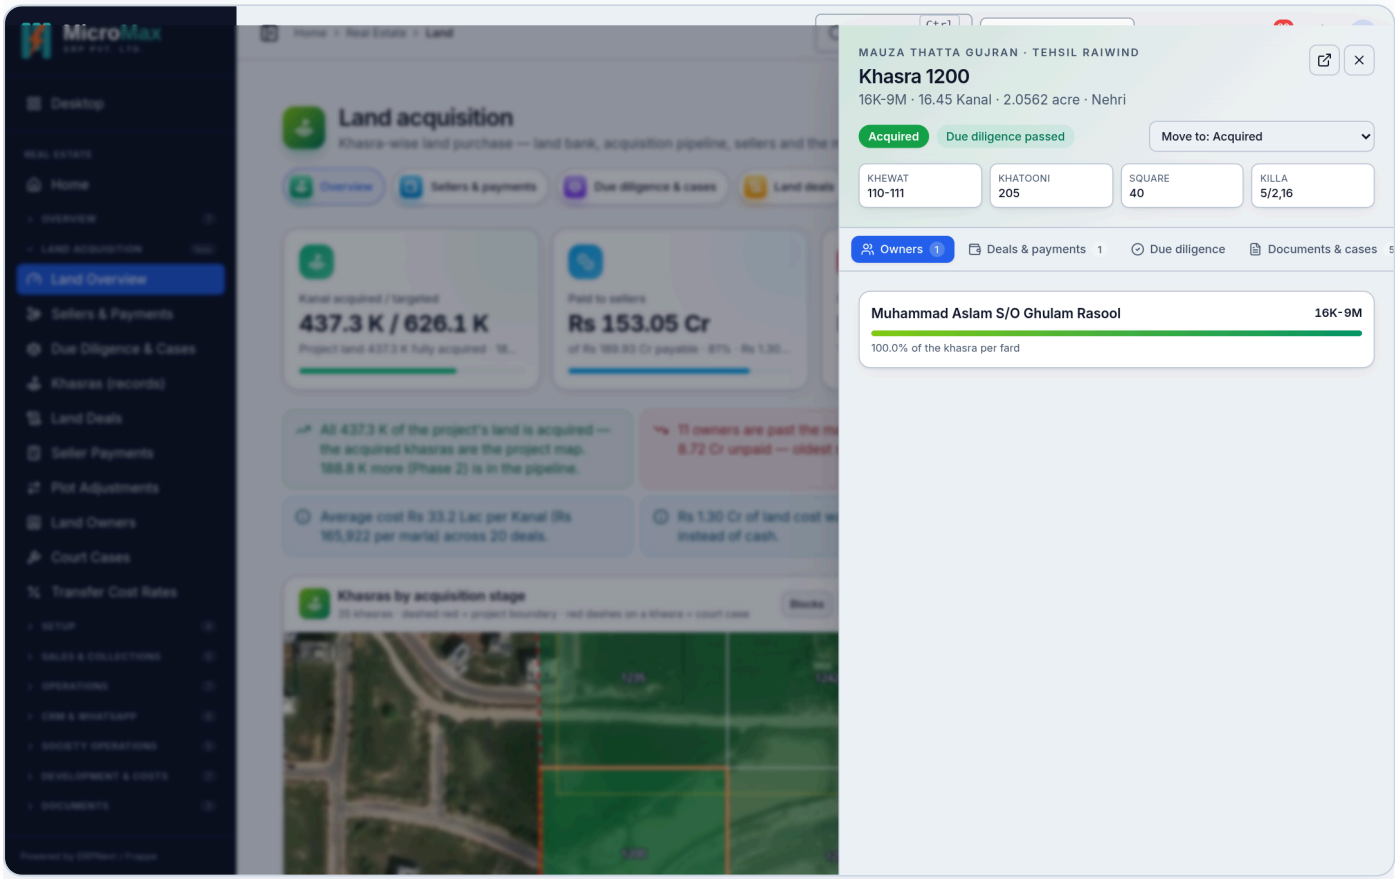

Land Overview — land bank, highlights and the khasra map.

2 Khasras, co-owners and the pipeline

1. **Khasras (records)** → **New**: mauza, khewat, khatooni, square, killa and khasra numbers (lists and ranges such as 43-44 or 5/2,16,17 are searchable), area in Kanal-Marla-Sarsai.
2. Add each **co-owner** with their share from the fard; shares cannot exceed the khasra's area.
3. On the **pipeline board**, drag a khasra to its next stage: Identified → Negotiation → Due Diligence → Token Paid → Agreement Signed → Payment in Progress → Registry / Mutation Done → Acquired.

The pipeline board: drag a khasra to move it.

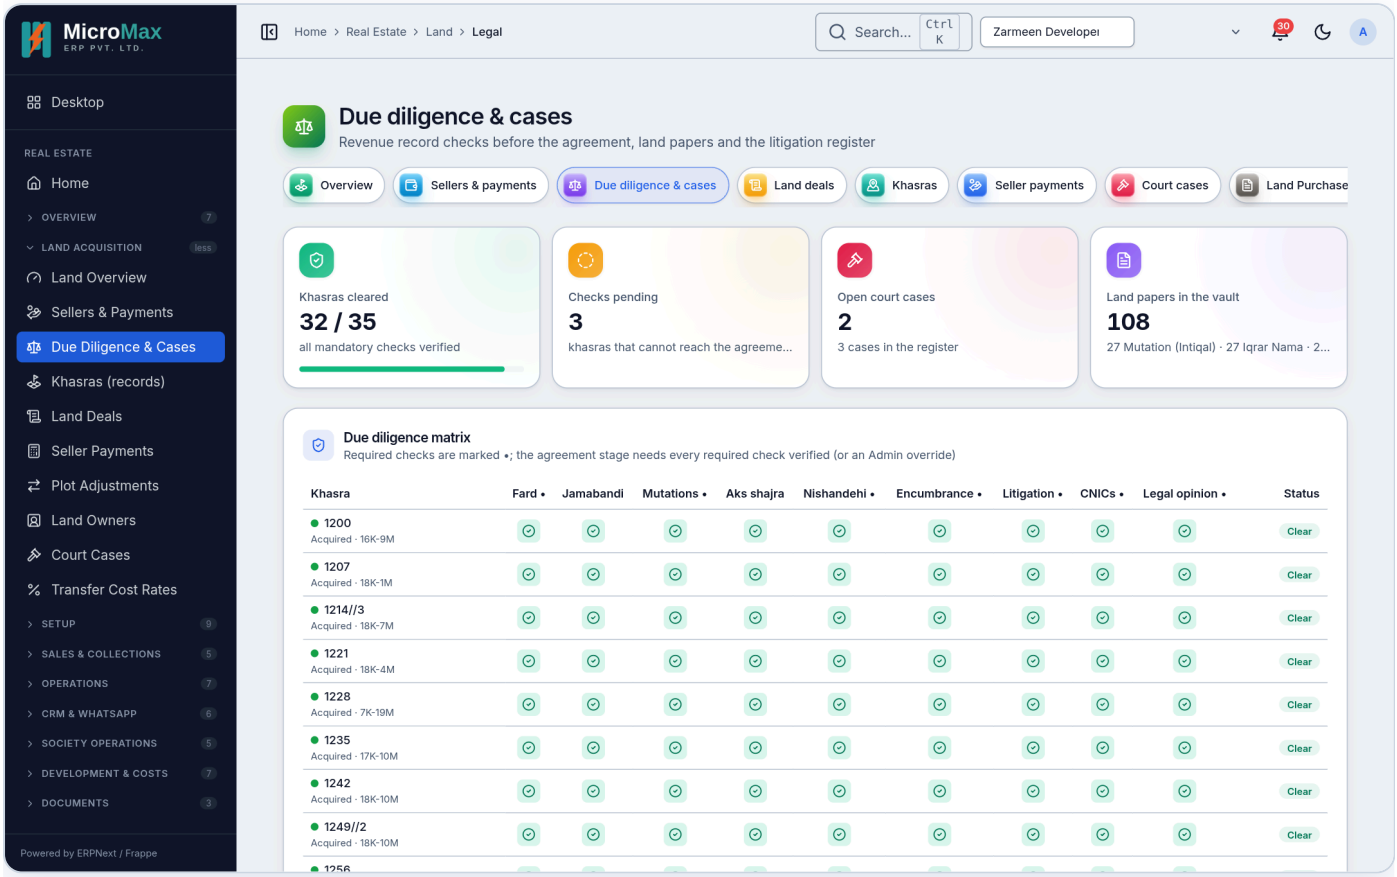

A khasra's panel: owners and shares, deals and payments, papers and history.

3 Due diligence and court cases

1. Every khasra gets nine checks: fard-e-malkiat, jamabandi, mutation history, aks shajra, nishandehi, encumbrance, litigation, seller CNICs and legal opinion. Seven are required.
2. The agreement stages stay locked until the required checks are **Verified** — or an Admin overrides with a reason.

3. **Due Diligence & Cases** shows the matrix for all khasras, the court cases with the next hearing, and the land papers in the vault.

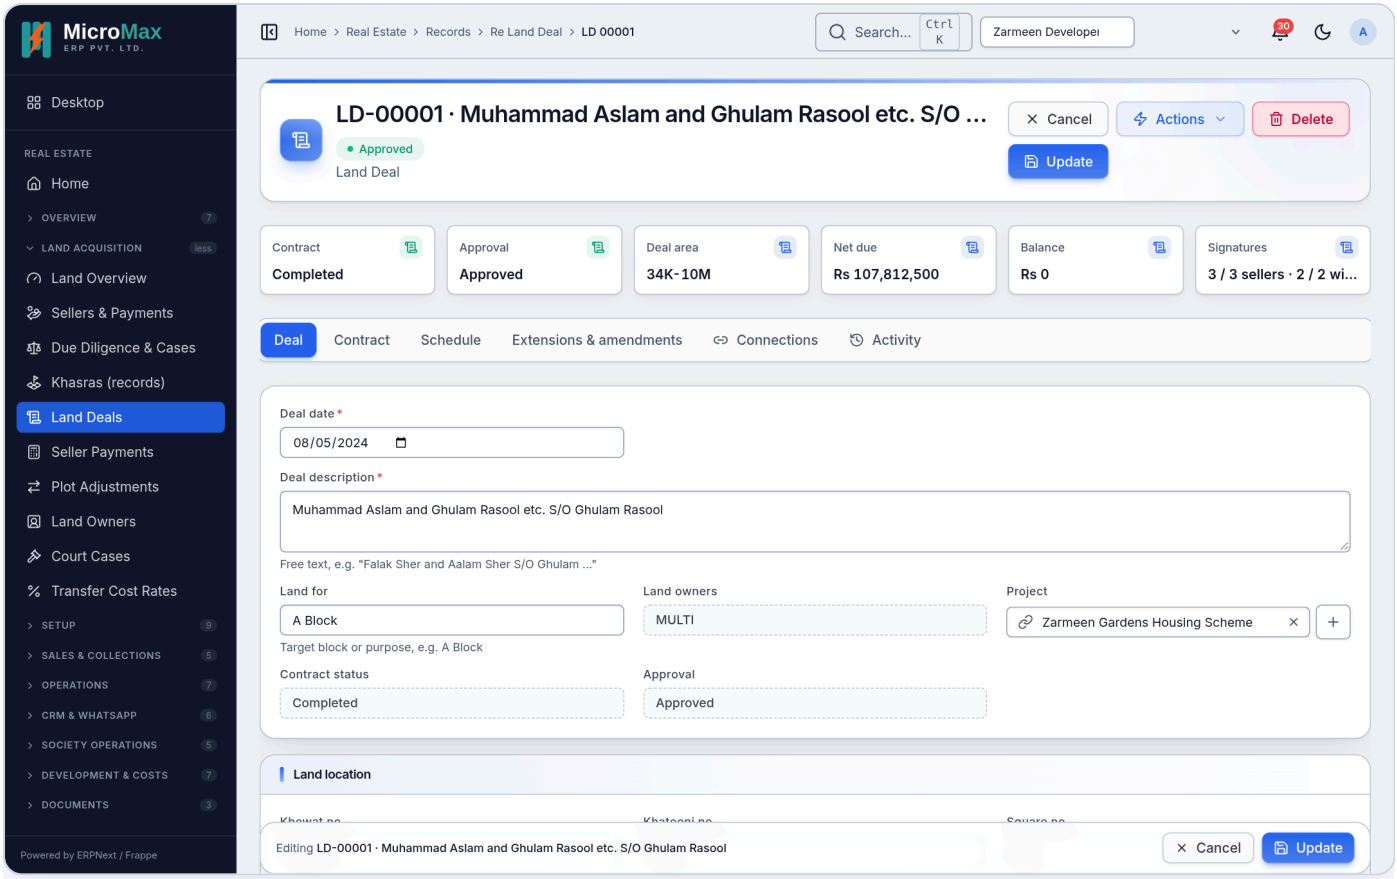

> Hearings, payment due dates and registry deadlines come to the responsible person's bell 7, 3 and 1 days ahead.

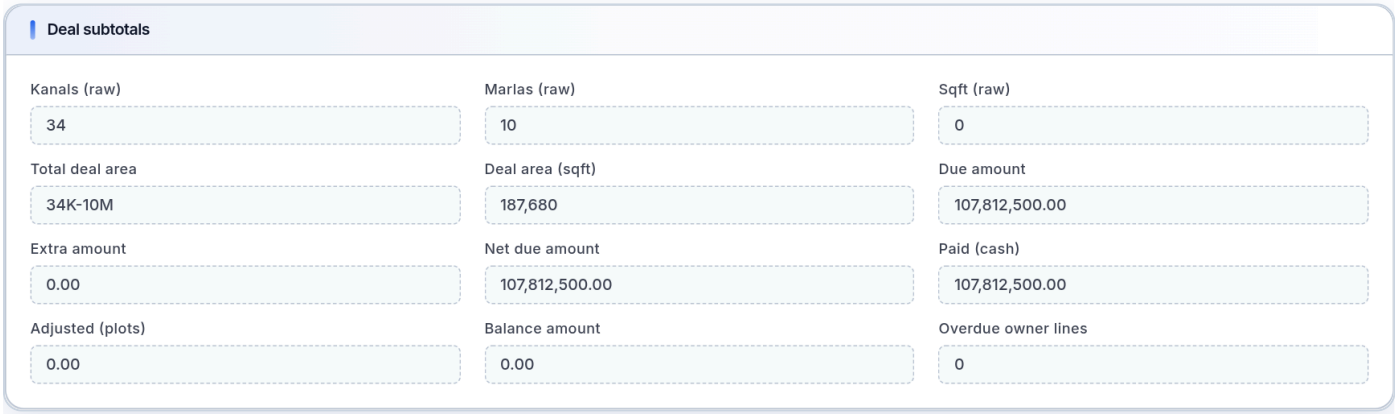

The due diligence matrix, litigation register and land papers.

4 The deal (iqrar nama)

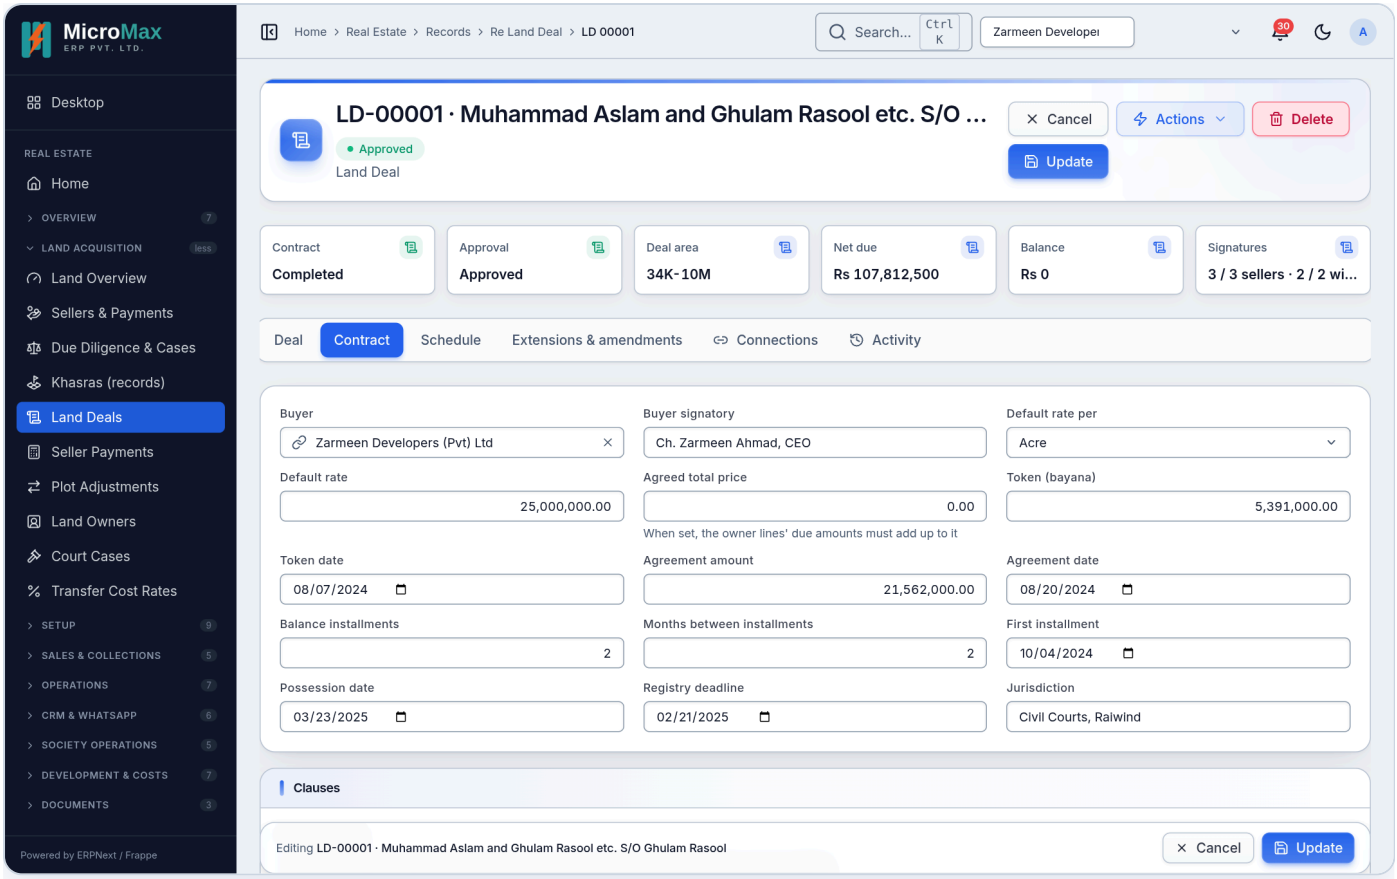

1. **Land Deals** → **New**: deal date, description ("Falak Sher and Aalam Sher S/O Ghulam …"), land for, khewat / khatooni / square / killa.
2. Add an **owner line** per seller: owner, khasra, Kanals, Marlas, Sqft, unit (Acre / Kanal / Marla) and rate. Due = area in the unit × rate (18K-10M at 25,000,000 per Acre = 57,812,500).
3. The **Contract** tab: token, agreement amount, installments, possession and registry dates, clauses, witnesses, stamp paper and transfer costs. **Build seller schedules** splits the terms by each seller's share.
4. The deal is **Executed** only when every seller and both witnesses have signed.

A multi-owner deal — status, approval, area, net due and balance.

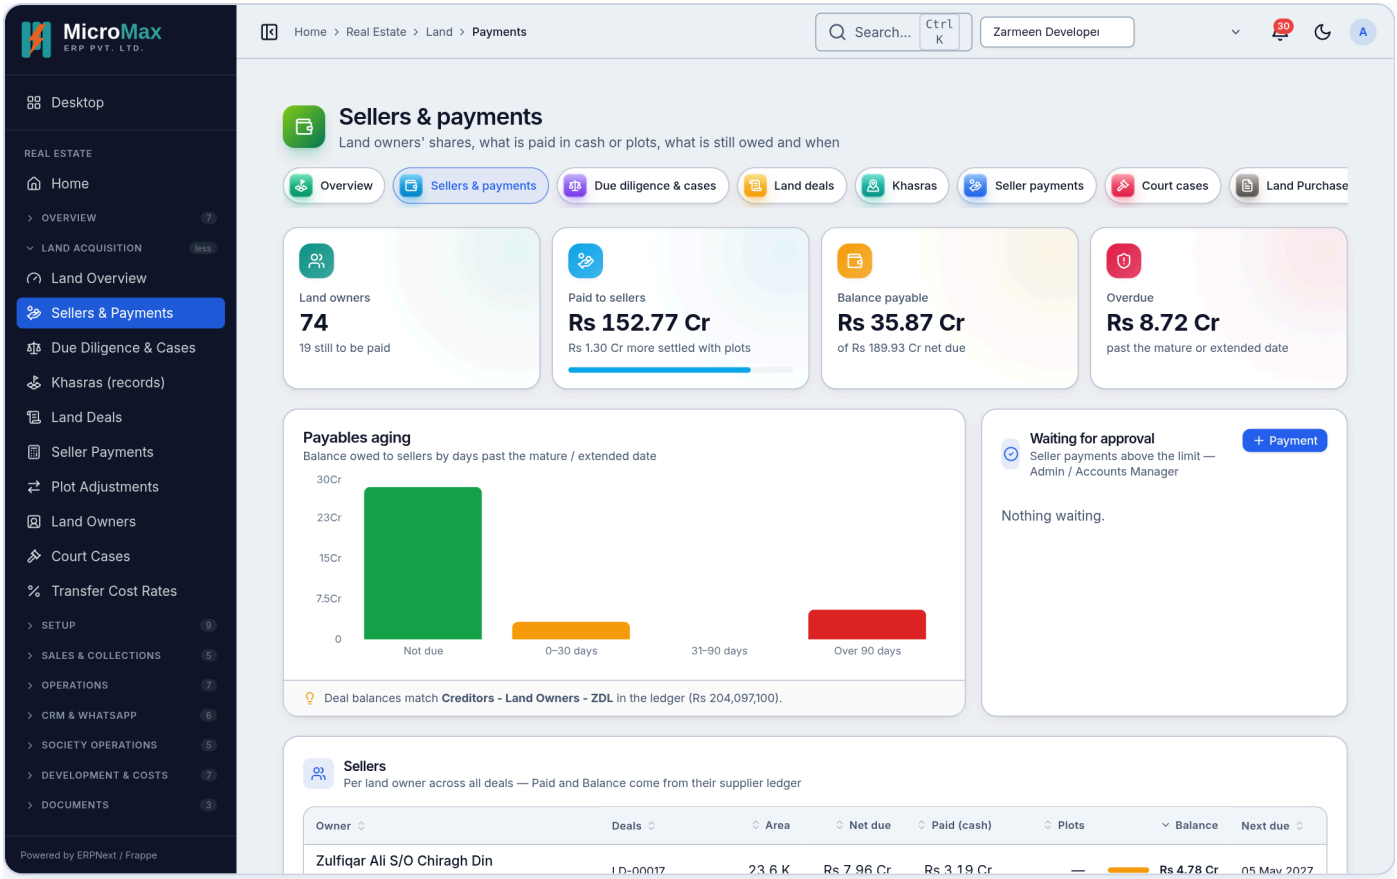

Owner lines and deal subtotals (raw Kanals and Marlas, normalised total).

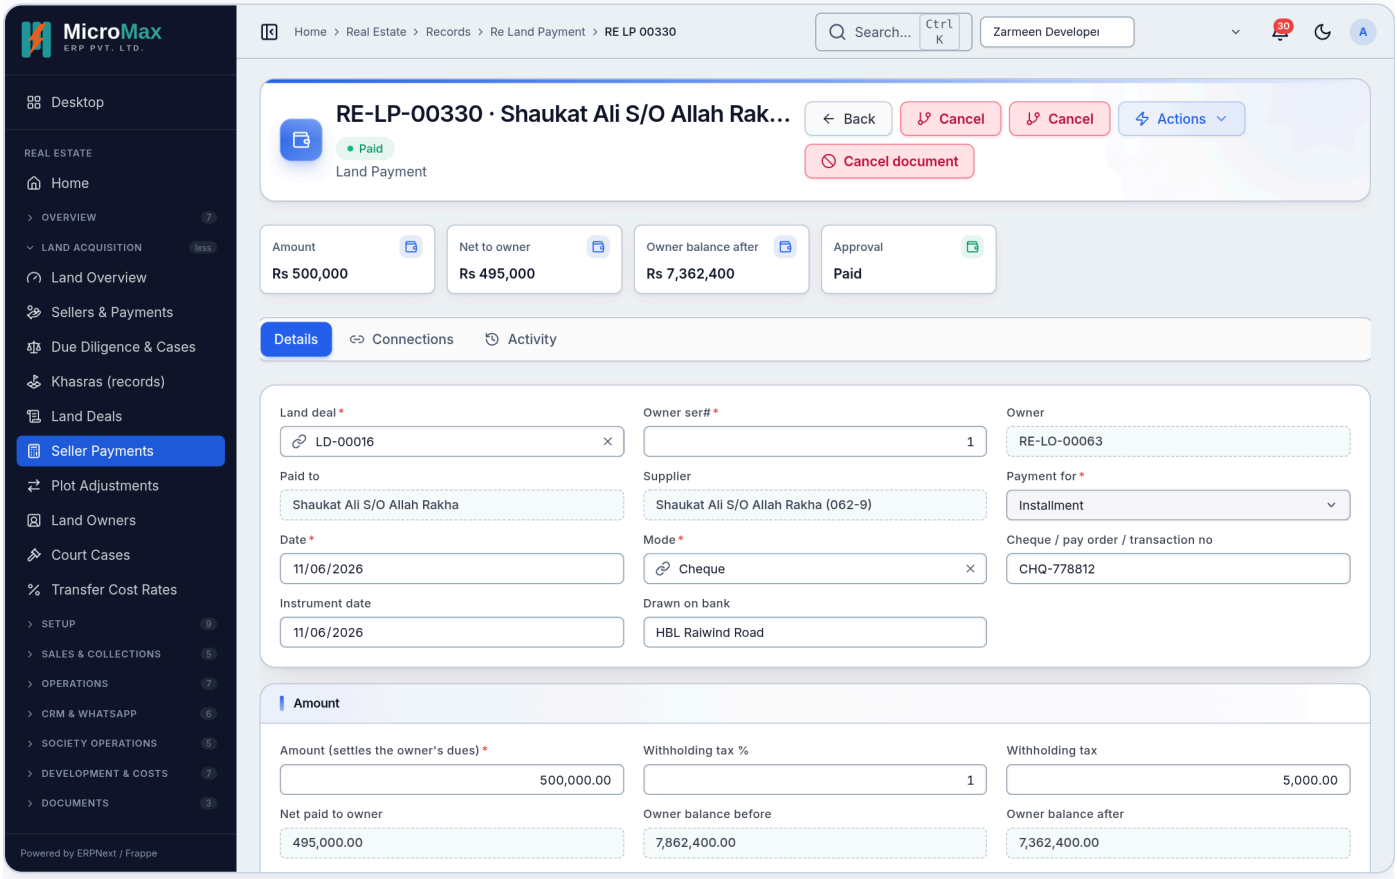

Contract terms, transfer costs, witnesses and stamp paper.

5 Approval, purchase invoices and seller payments

1. **Submit for approval**; an Admin or Accounts Manager approves. Approval posts a **Purchase Invoice per owner**: Dr Land Under Acquisition, Cr Creditors - Land Owners.
2. **Record seller payment**: cheque, pay order, transfer or cash, with withholding tax. Up to Rs 5,000,000 it is paid directly; above, it waits for approval. A token paid before approval is an advance.
3. Extensions (more time with an extra amount) and amendments (add a seller, change a share, cancel an owner) each go through approval and post their own entries.

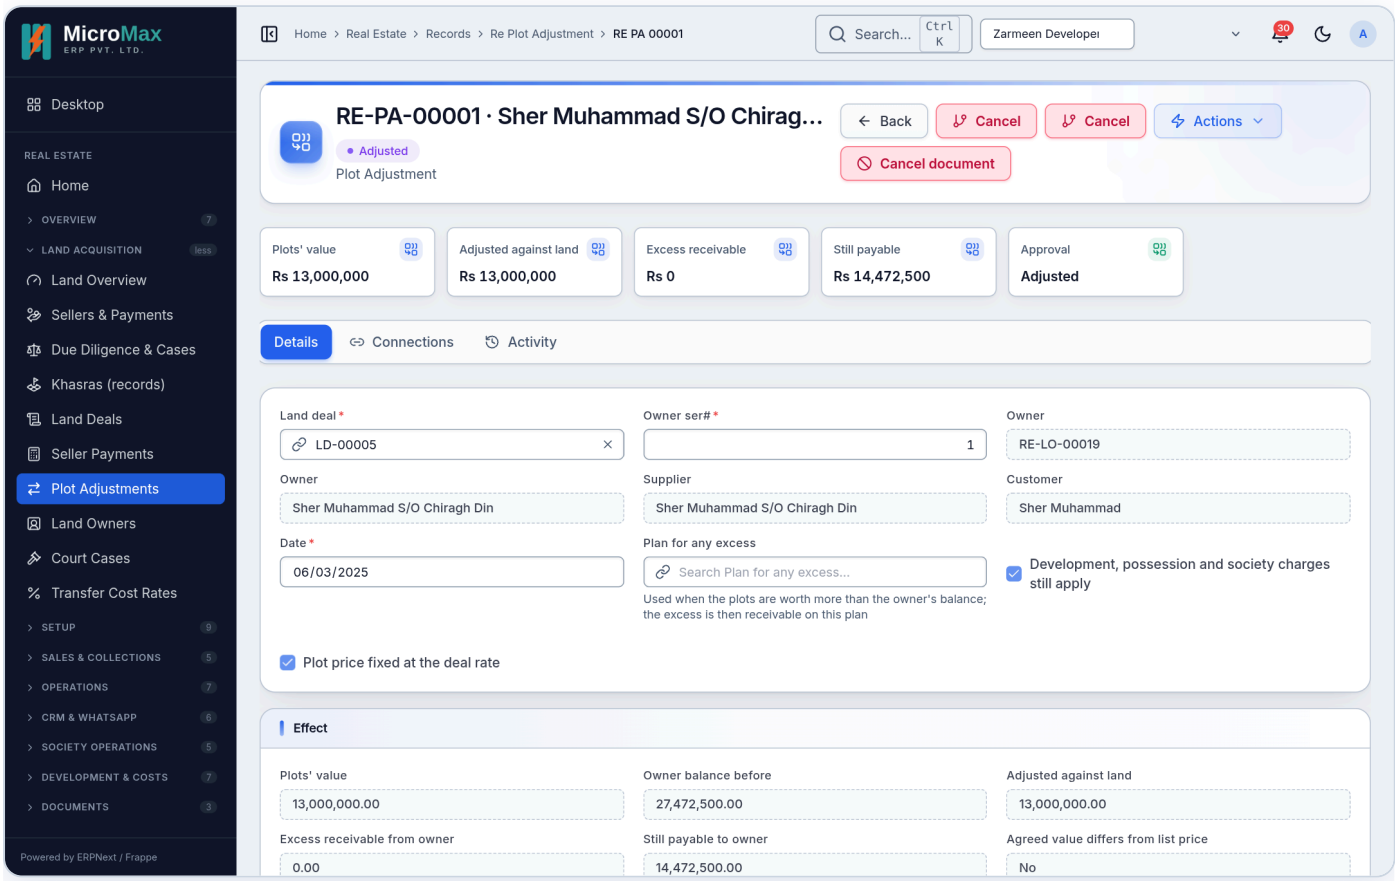

Sellers & Payments — balances from the supplier ledger, aging and what is due.

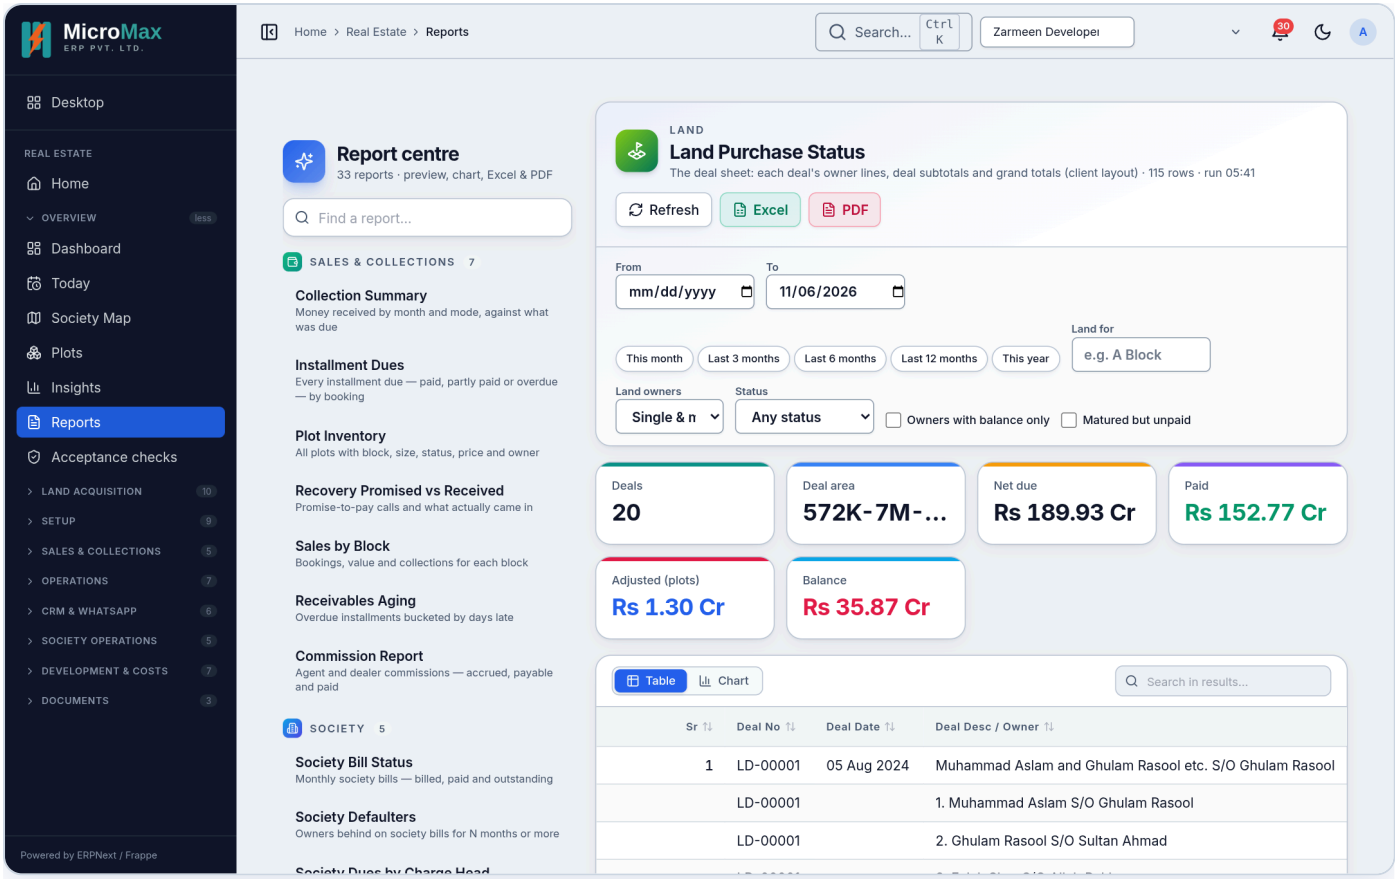

A seller payment: amount, tax withheld, net paid and the balance after.

6 Plots instead of cash, registry and land cost

1. **Adjust with plots**: pick available plots; on approval each is booked to the owner (as a customer) and netted against their land payable by a Journal Entry — no cash moves.
2. Mark each owner **Registry Done** / **Mutation Done**; the deal becomes **Completed** and the khasra **Acquired**.
3. **Capitalise land cost** (Admin / Accounts) moves the cost to the project's land cost; Module 2 counts it under Land & Legal.

A plot adjustment — plots, values, adjusted amount and what is still payable.

The Land Purchase Status report in the client's layout.
