ZARMEEN GARDENS REAL ESTATE ERP · SALES GUIDE

Sales & booking — leads, visits and bookings

From an enquiry to a booked plot: leads and follow-ups, site visits, the deal pipeline, choosing a plot, the booking with its schedule and Sales Invoice, and the allotment letter in English or Urdu.

1 · Lead
Source, agent, follow-up

2 · Visit
WhatsApp invite, result

3 · Deal
Pipeline to booking

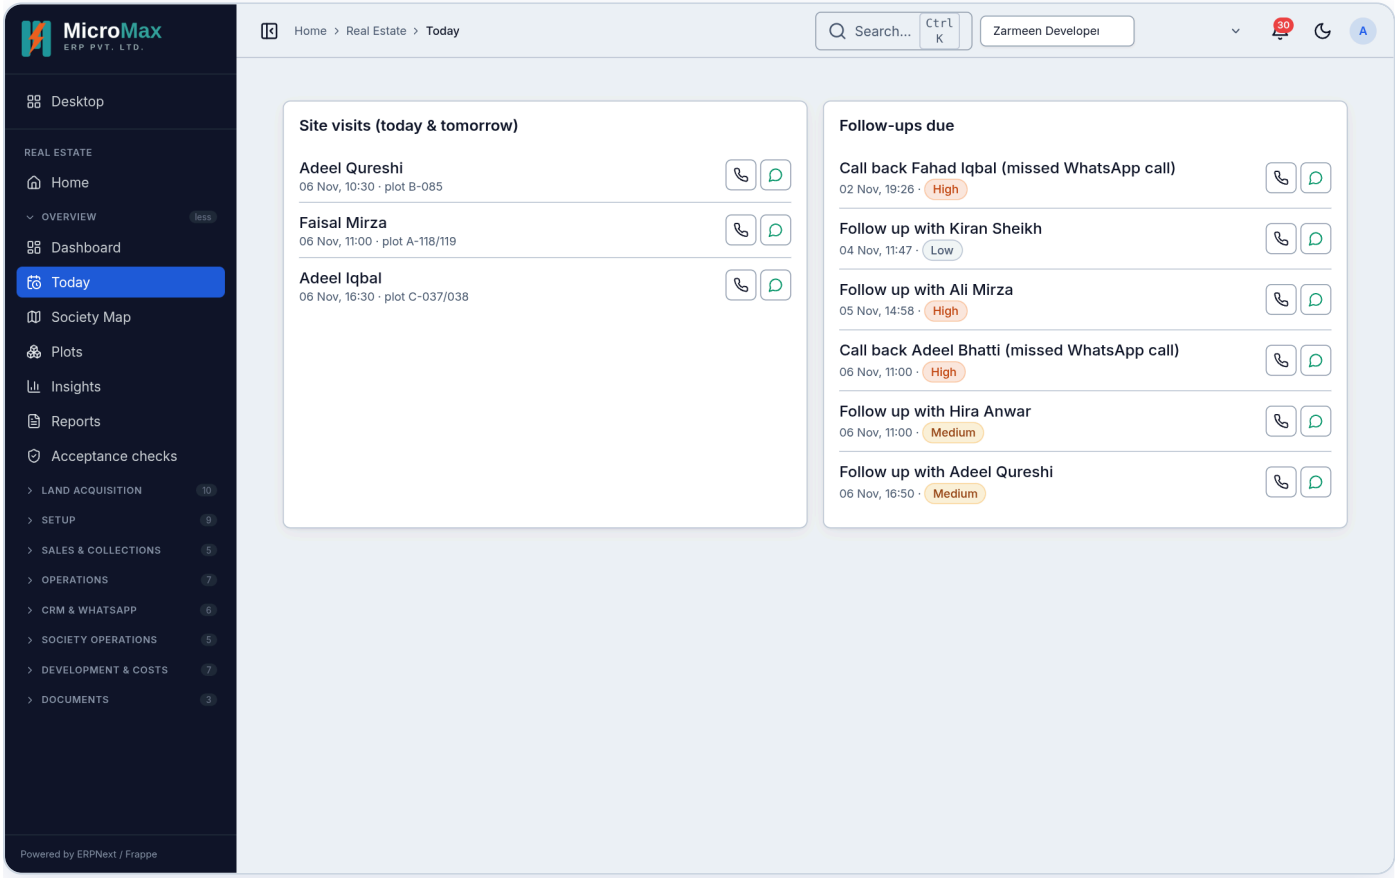

4 · Booking
Plot, plan, discount

5 · Allotment
Schedule, invoice, letter

Who: Sales Agent (own records), Sales Manager (all, discount approval), Accounts.

1 Your day

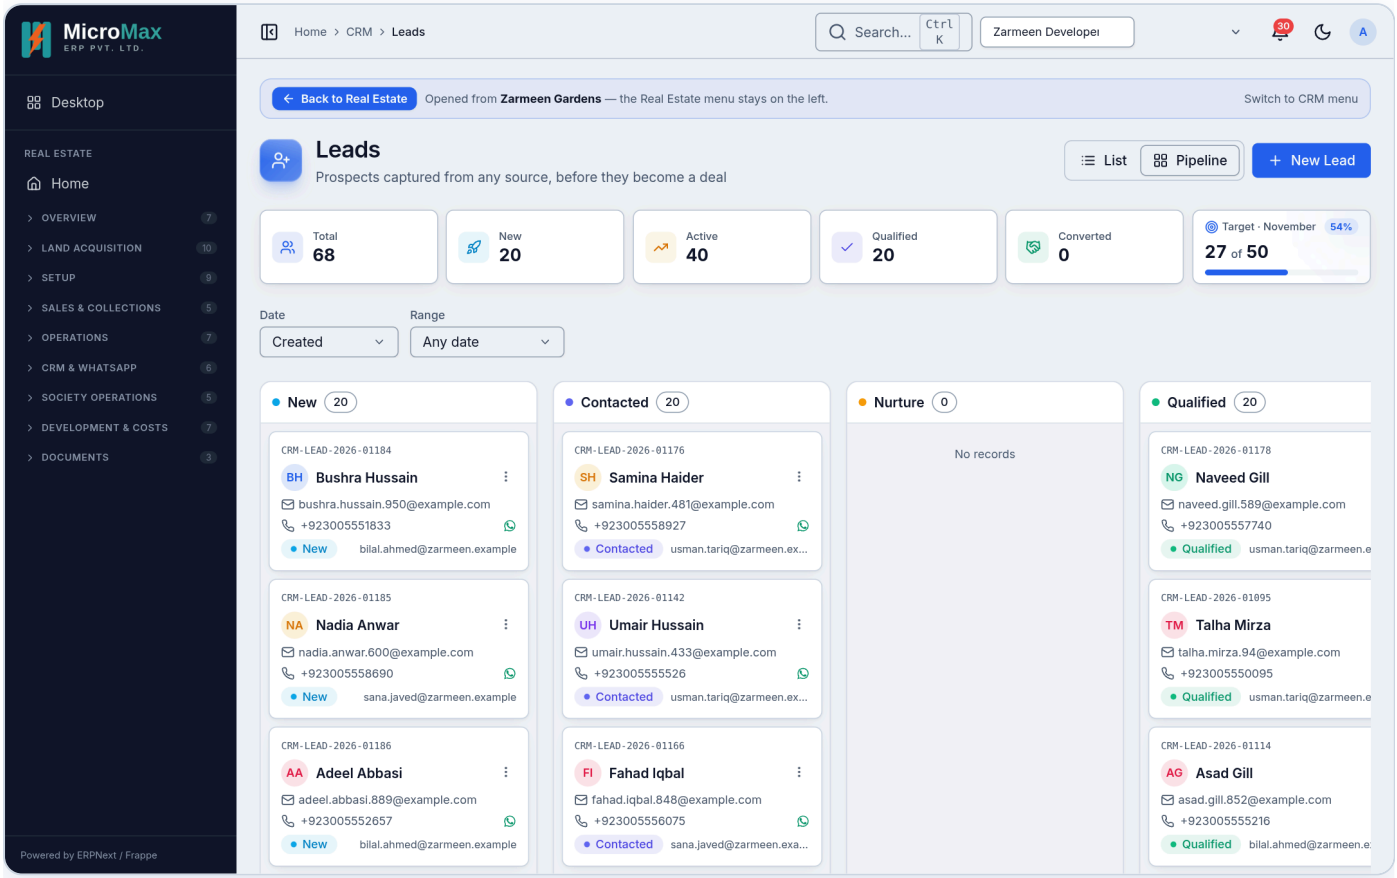

1. **Today** lists today's site visits and follow-ups with call and WhatsApp buttons.
2. Missed calls become follow-up tasks; the bell shows what is new.

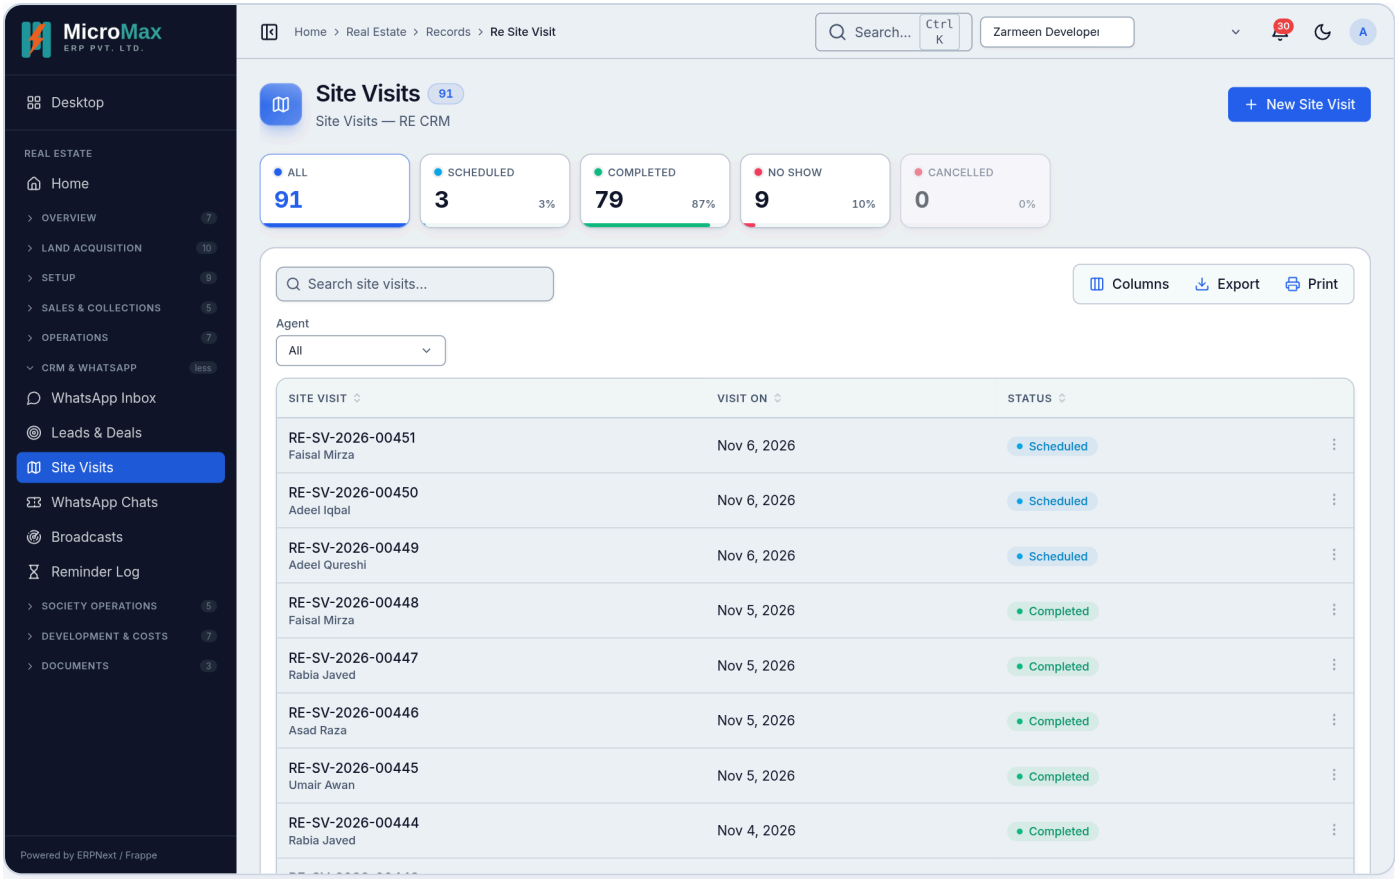

Today — visits and follow-ups.

2 Leads, deals and site visits

1. **Leads & Deals** (CRM): every lead with its source and agent; deals move Opportunity → Site Visit → Negotiation → Booking.
2. An incoming WhatsApp from an unknown number creates a lead automatically.
3. **Site Visits**: schedule with a WhatsApp invitation, then record the result.

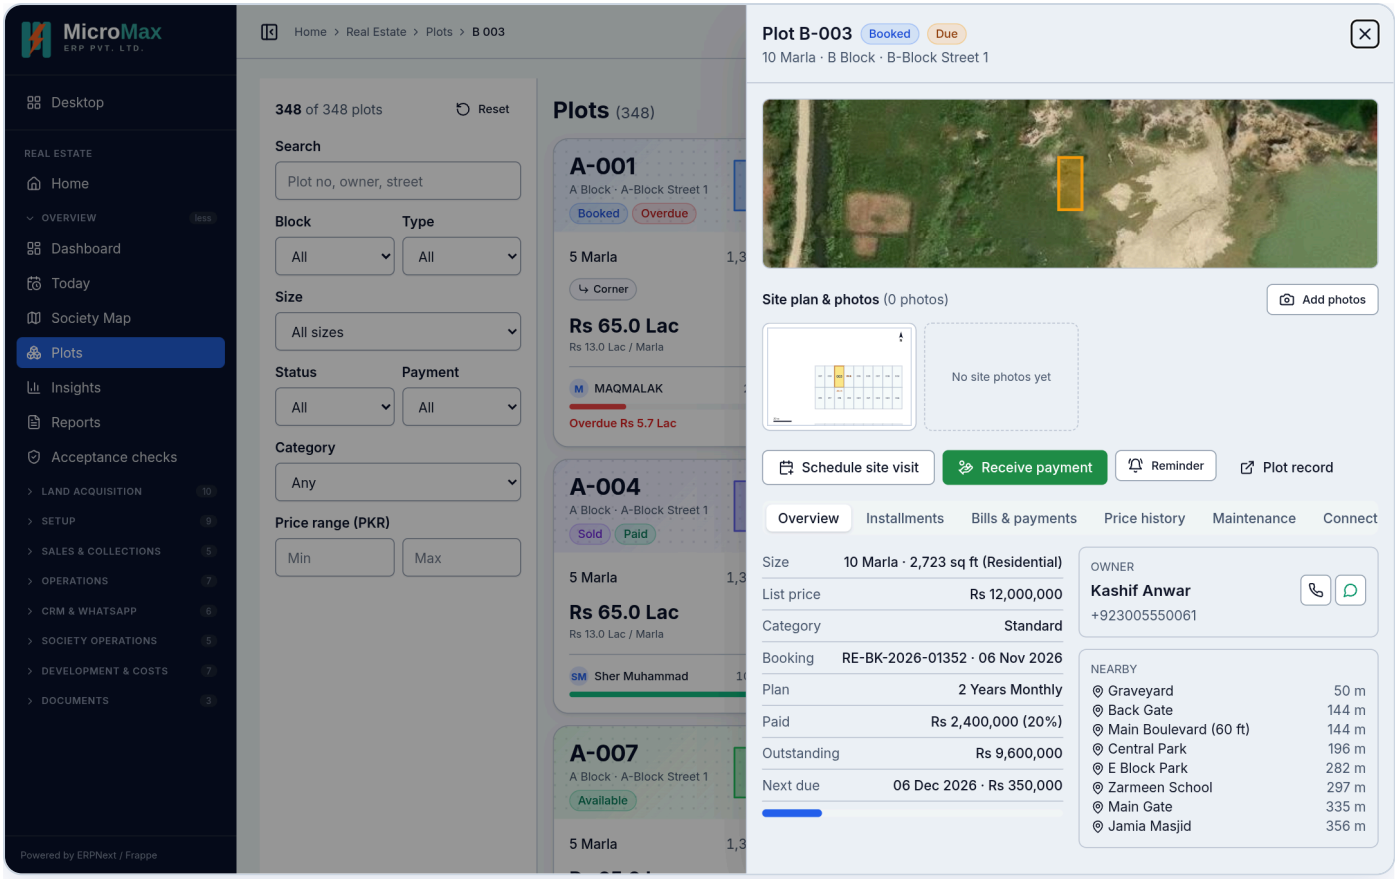

The CRM pipeline.

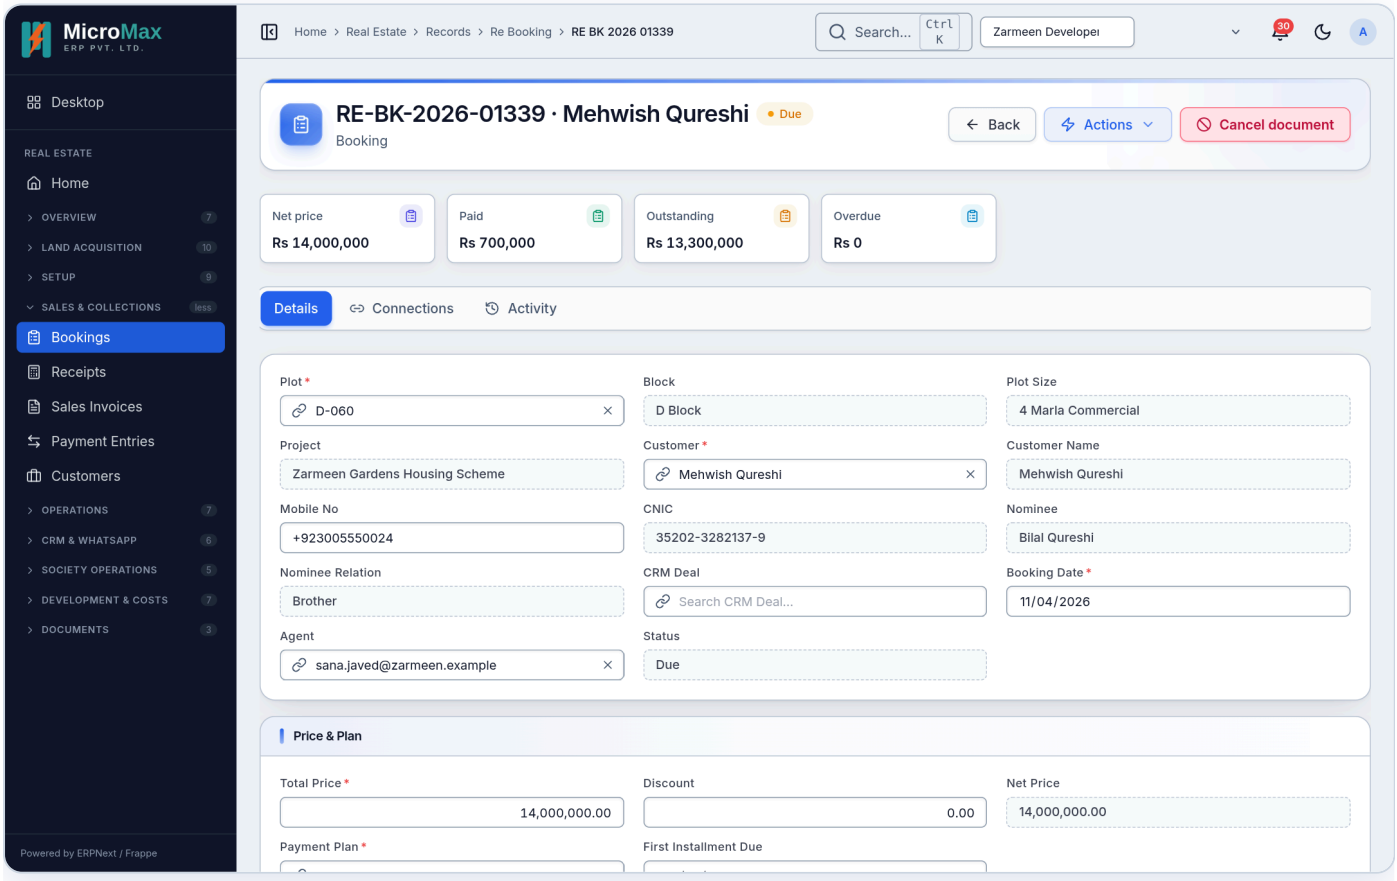

Site visits and their results.

3 Choosing a plot and booking it

1. **Plots** (cards or table, filters by block, size, price, status) — open a plot for its panel and click **Book plot**.
2. The booking needs a customer with CNIC and nominee, the plot, price, discount and payment plan. A discount above 5% waits for the Sales Manager.
3. **Submit**: the schedule is built from the plan, the plot becomes Booked and a Sales Invoice carries the same schedule.

The plot panel — price, location, history and actions.

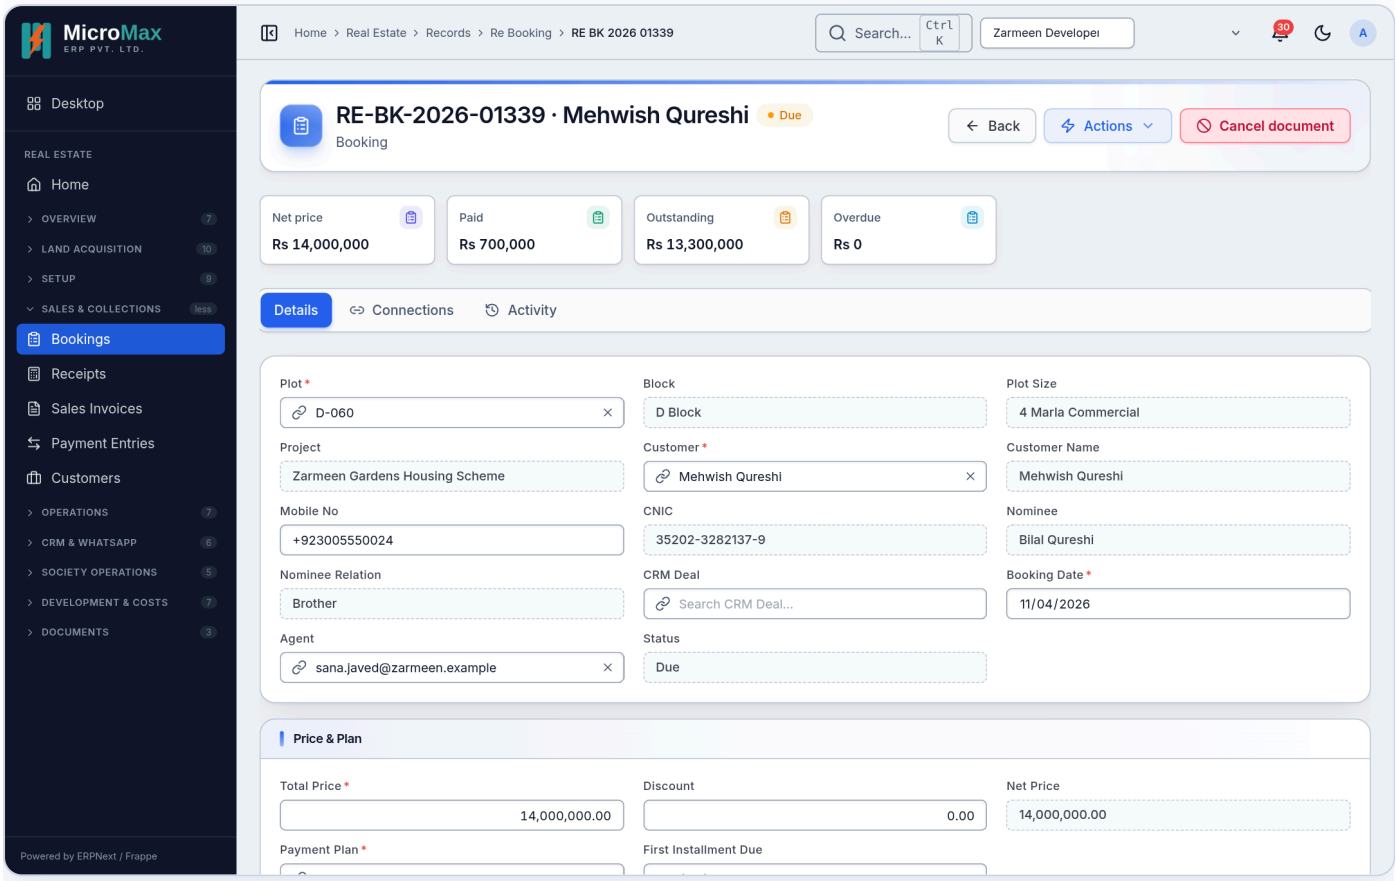

A submitted booking with paid, outstanding and next due.

4 Schedule and allotment letter

1. The **Installments** tab shows every installment with its status (Unpaid, Due, Overdue, Partly Paid, Paid).

2 **Actions → Letters & forms** generates the allotment letter, schedule, application form and sale agreement in English or اردو, as numbered versions.

Installments — always totalling the net price.
